(54) Title: METHOD AND APPARATUS FOR COMPENSATING COLOR IN THE DISPLAY DEVICE OF A USER'S TERMINAL THROUGH THE NETWORK

WO 2005/066869 A1

(57) Abstract: The present invention provides a method and apparatus for rapidly and precisely altering colors on a display device provided in the user's terminal so that a user having color vision deficiency can obtain the same color information as a normal person. The present invention enables a user having color vision deficiency to normally view all the colors displayed on a display device in such a way as to automatically diagnose color vision deficiency via the web, generate an automatic color alteration palette based on the diagnosis results, and install the automatic color alteration palette in the display device provided in a user's terminal, so as to provide altered colors to a person having color weakness as well as a color deficient person.
